

BREATHING AIR CONTROL PANELS AND ACCESSORIES

I.S.O / D.O.T. CYLINDER VALVE PROTECTOR CAP MEETS NFPA-1901 2016 EDITION

NFPA-1901, Chapter 24, Section 5, Paragraph 24.5.6 reads as follows

24.5.6 Air Tank Mounting

(24.5.6.1) Air tanks shall be mounted in an arrangement that will hold the tanks in all types of mobile use.

(24.56.1.1) A protective device(s) shall be provided to protect the air tank valve(s) and associated piping from damage as a result of accidental impact. (24.5.6.1.2) the protective device(s) shall not prevent access for operation and inspection.

This protective cap will meet the NFPA requirements shown above. It's easy to install, inexpensive and made with top quality materials. The finish is powder painted grey for durability. Will fit many cylinders including the Norris and Taylor-Wharton lightweight 2400 PSI, 3600 PSI, 4500 PSI, 5000 PSI, and 6000 PSI I.S.O / D.O.T. cylinders.

Helping you breath a little easier.
